

MANOJ KUMAR PINNIBOYINA

Associate Software Engineer | Java Full Stack Development
Nellore, Andhra Pradesh | +91 9392908223 | manojkumar.p9392@gmail.com | [Linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Web Developer specializing in backend services and **full-stack application development**. Experienced in building **REST APIs with Java and Spring Boot**, developing responsive user interfaces, and working with data pipelines. Focused on clean architecture, well-documented APIs, maintainable code, and reliable systems.

TECHINAL SKILLS

Languages: Java · JavaScript · SQL · HTML5 · CSS3 · JSON
Frameworks & Libraries: Spring Boot · React · Hibernate · JPA · Tailwind CSS
Backend & APIs: REST APIs · Microservices · Event-Driven Architecture · Data Processing & Validation
Data & Messaging: Microsoft SQL Server · Apache Kafka · Redis · Neo4j
DevOps & Tools: Docker · Git · GitHub · CI/CD · Jira · IntelliJ IDEA
AI & Development Practices: Agile / Scrum · Error Handling & Logging · Unit Testing, Claude · GitHub Copilot

EXPERIENCE

Associate Software Engineer | Trinity Mobility · Bengaluru, Karnataka March 2026 — Present
Internship: March – June

- Develop and maintain **Java and Spring Boot microservices and REST APIs** for production applications.
- Build and enhance **React-based user interfaces** integrated with backend services.
- Work with **Apache Kafka and Redis** to support event-driven workflows, real-time data processing, and distributed services.
- Implement **data validation, normalization, and processing** to ensure reliable downstream data flow.
- Write **unit and integration tests** using JUnit and Mockito to improve application reliability.
- Troubleshoot application issues, strengthen **error handling and logging**, and resolve defects across frontend and backend services.
- Collaborate within an **Agile/Scrum** team using Git, GitHub, Jira, and CI/CD practices.

PROJECT INVOLVED IN:

Real-Time Data Streaming & Workflow Platform | Enterprise Distributed Systems

Areas of Contribution:

- Backend & Microservices:** Developed Java/Spring Boot services for event ingestion, processing, validation, and business workflow execution.
- Data Pipelines:** Implemented data validation, normalization, and transformation for consistent processing across multiple data sources.
- Event Streaming & Caching:** Worked with **Apache Kafka** for event-driven processing and **Redis** for fast state management and data access.
- Full-Stack Development:** Built React-based configuration interfaces and integrated them with REST APIs for end-to-end workflow management.

EDUCATION

B.Tech. in Artificial Intelligence & Machine Learning 2021 – 2025
Andhra Engineering College, JNTUA | **CGPA: 8.2 / 10**
